

Jean Abbott was misdiagnosed as a young child with a form of Cerebral Palsy. After 33 years of countless doctor's visits, unnecessary medications and surgeries, she was correctly diagnosed with DRD.

Since Jean's story appeared on the *Today Show*, *Good Housekeeping*, *Yahoo!*, and the U.K.'s "Daily Mail", an overwhelming number of people from around the world have contacted Jean to tell her how inspired they were by her journey from "wheels to heels". Her positive attitude is highly contagious as she encourages others to appreciate the little things in life.

Please welcome, Jean!
